Introducing the: MHM BALER 400

producing mill sized bales 400 - 500kg

General Description

This is a powerful unit which has an auto-eject system and evenly applies pressure across the bale via twin rams, turning your recyclable materials into 'wire-tied' mill size bales up to 500kg (dependent on waste stream) optimising rebate values and greatly reducing waste disposal costs. Retaining claws are fitted as standard to prevent spring back of the material. Fully automated bale ejector. Large loading aperture for easy loading of cardboard boxes.

12 months parts and labour warranty.

Technical Specification

Height:	3.000m
Width:	1.781m
Depth:	1.196m
Weight:	1300kg
Power Supply:	400 volt 3 phase
Cycle time:	40 seconds
Loading Aperture:	1.2m wide x 0.68m high

Noise: 75 d(B)A

Bale Dimensions

Height of Bale	1.00m
Width of Bale	1.20m
Depth of Bale	0.80m
Weight of Bale	400 to 500kg (dependent on waste stream)
Motor:	11kW 32Amp
Pressing Force:	Up to 25 Ton
