Introducing the : MHM POWERBALE 50XL Semi-Automatic Horizontal Baler

General Description:

The MHM 50XL Semi-Automatic Horizontal is a mid-range baler with market leading bale weights and an attractive price compared to competitors on the marketplace. The MHM Powerbale 50XL Semi-Automatic is a heavy-duty machine with a simple operator friendly design, it produces bales up to 600kg – depending on the waste stream and the method of loading. 1250mm x 1100mm x 1100mm (L x W x H) and dependent on feed it produces bales up to 2.4 tonne per hour. The MHM Powerbale 50XL Semi-Automatic Horizontal Baler makes light work of baling large volumes of a variety of waste materials with the minimum amount of effort. Ripping teeth are fitted as standard to our 50XL, 5 Horizontal wire ties with easy wire feed which means no more climbing atop slippery machines to get the wires pulled through. The MHM Powerbale 50XL has a portcullis door with anti-wire snap technology and full bale ejection. Bale chamber wear plates are fitted as standard giving the MHM Powerbale 50XL unrivalled serviceability against its competitors. The controls have multi product selection capabilities for various products ensuring maximum bale weights
