## Introducing the: MHM1500S Static Compactor

### General Description

The MHM1500S Range of Static Compactors are designed to have a small footprint but are suited to heavy industrial use. This unit is ideal for general waste.

The MHM1500S is either filled by hand or by hydraulic bin lift designed to work with 240-1100 liters Wheelie Bins or with a manual fill door or loading hopper.

An extremely reliable and well-built machine with a powerful compaction force.

All static compactor machines sold are installed by our service department and full operator training is given on installation.

Our recycling machinery is compliant, and CE marked and carries a 12 month parts and labour warranty.
