

MHM - JOVISA JS2000

The JS-2000 fully automatic horizontal baler is the biggest baler by far in the range, with a ram pressure of 125 tonne up to 240 tonne and production of 40 tonne per hour.

Bale weights up to a massive 1.5 tonnes can be produced according to the bale length, which can be set up electronically. Like all machines in this range you can set various configurations to suit your individual needs.

This fully automatic horizontal baler can be specified with either horizontal or vertical needles for the unique tinging system and we can also supply the JS-2000 with cord baling system.
